- ✓ LEVERAGE TECHNOLOGY TO SUPPORT HIGH REVENUE CYCLE PERFORMANCE
- ✓ AUTOMATE HIGH VOLUME TRANSACTIONAL PROCESSES
- ✓ STREAMLINE BILLING AND COLLECTION FUNCTIONS
- ✓ LOWER AR DAYS
- ✓ ENHANCE THE PATIENT EXPERIENCE

LEVERAGE POWERFUL PARTNERSHIPS

VENDOR RATIONALIZATION

Our revenue cycle team works with clients to ensure they get the best possible value and service from suppliers. We recognize the need to hold vendors accountable by identifying duplicative capabilities and contract negotiation opportunities that streamline applications, increase accountability, and decrease cost.

PERFORMANCE IMPROVEMENT

Avaap's approach to performance improvement builds upon the knowledge of your clinicians and their vision for optimization opportunities. We help clients identify strategies for improving front and back-end processes and innovate to meet new challenges, regulations, and reimbursement requirements with greater efficiency and effectiveness.

INTELLIGENCE-DRIVEN INSIGHT

Our BI tools provide improved monitoring of revenue cycle processes, including traditional revenue cycle metrics (such as net days in accounts receivable or discharge not final billed), but also nontraditional revenue cycle metrics (such as actual collection at point of service by amount owed) to track performance, spot trends and identify opportunities for improvement. Clients benefit from precision in where to focus improvement efforts while developing and enforcing systems of accountability around monitoring and reporting practices.

A HOLISTIC ENCOUNTER

Upfront attention to patient experience can positively impact patient satisfaction and getting payers to pay you. Avaap helps clients leverage best practices to make billing and payment processes more efficient and consumer-friendly. The result is a seamless clinical and business experience for patients across the care continuum.

BUILD YOUR PROGRAM

EXCEPTIONAL CONSULTANTS. SUSTAINABLE RESULTS.

Avaap is a KLAS-recognized industry-focused management and technology consulting firm with experience in Workday, Tableau, and other applications.
