

CHANGE MANAGEMENT FOR PROJECT MANAGERS

Designed for project and program managers who are leading transformational efforts (i.e., new systems, processes, policy etc.) which impact people. This engaging instructor-led workshop is for those who want to understand the value of change management, how to best partner to support sponsors, increase user adoption, and achieve overall initiative success. This class leads participants on a journey to explore their role as a project manager leading change projects and how to best partner with their change manager, and in the absence of a change partner, how to execute several key change deliverables.

Throughout the workshop, participants will exchange ideas, share challenges, engage in active discussions, and develop a personal project manager change roadmap to put their learning into action.

LEARNING OBJECTIVES

- ✓ Review the value of change management
- ✓ Explore how change impacts you and others
- ✓ Understand the collaborative relationship between project management and change management
- ✓ Develop a customized project manager change roadmap
- ✓ Learn five key change tools
