

Avaap DATA, ANALYTICS, & AI FOR HIGHER EDUCATION

Turn Campus Data Into Strategic Insight

Your institution generates valuable data across finance, human capital management, payroll, planning, student operations and more — whether it lives in Workday, a legacy ERP, a student information system, or a mix of all three. For many institutions, that data remains trapped in reports, spreadsheets, and disconnected systems, making it difficult to answer critical business questions quickly and confidently.

Avaap helps higher education institutions unlock the full value of their data through modern data platforms, analytics, AI, and decision intelligence. By combining deep enterprise systems expertise with advanced data and analytics capabilities, Avaap enables institutions to move beyond reporting and create a trusted foundation for better planning, faster decisions, and measurable outcomes — no matter what systems your data lives in today.

What Avaap Delivers

Faster, More Actionable Reporting

Replace manual reporting processes with automated dashboards and analytics that give stakeholders the information they need, when they need it.

Better Planning and Forecasting

Enable leaders to evaluate enrollment and financial trends, monitor performance, model scenarios, and make more informed decisions using reliable, governed data.

AI-Ready Data Foundations

Establish the architecture, governance, and data quality necessary to support AI, machine learning, predictive analytics, and advanced decision intelligence initiatives.

Long-Term Data Strategy

Create a roadmap that aligns analytics investments with institutional goals, ensuring technology delivers measurable value - whatever your current systems landscape looks like.

Better Data. Better Decisions. Better Outcomes.

Avaap helps higher education institutions transform operational data into strategic insight, enabling smarter planning, faster decisions, and greater impact — wherever you are on your data journey.

Ready to accelerate institutional transformation?
Let's connect.

Avaap Data, Analytics, & AI Services

- ✓ **Analytics Strategy:** Align reporting, analytics, and data modernization initiatives with institutional priorities.
- ✓ **Data Integration & Engineering:** Connect your ERP, SIS, and other campus systems to create a unified data ecosystem.
- ✓ **Modern Data Platforms:** Design and implement scalable cloud-based data platforms that support enterprise reporting, analytics, and AI initiatives.
- ✓ **AI & Advanced Analytics:** Enable forecasting, predictive modeling, trend analysis, and AI-powered decision support built on trusted data.
- ✓ **Data Governance & Security:** Implement governance frameworks, role-based security, and data management practices that support trust, compliance, and scalability.

Why Organizations Choose Avaap

Many Avaap consultants have worked in higher ed, providing a rare combination of enterprise systems depth and higher ed industry understanding.

Avaap is a Snowflake Elite Partner, Tableau Premier Services Partner, and 2025 Alteryx Innovation Partner of the Year, giving clients validated expertise across the modern analytics stack.

All data initiatives are paired with organizational change expertise to drive adoption, not just deployment.
